

Here are my grades for problem 1.

Doug Ahler:	Check Plus
David Broockman:	Check Plus
Val Morash:	Check
Danny Choi:	Check Plus
Hannah Lacquer:	Check Plus
Ryan Copus:	Check Plus
Michael Dougal:	Check Plus
Chris Krogslund:	Check Plus
Joy Milligan:	Check
Hye Kyung Lee:	Check
Kamille Taagholt:	Check
	Note: Important idea: outliers make smaller (but still relevant) differences in covariates look more negligible.
Andrew Bertoli:	Check
David Dow:	Check
Oleg Sofrygin:	Check
	Note: Important idea: outliers make smaller (but still relevant) differences in covariates look more negligible.
Hyo Jeong Shin:	Check
	Note: What if you have two relevant binary variables, one with $p \approx 1/2$ and one with $p \approx 0$ ?
Adam Bloniarz:	Check Plus
